Many children learn to say "I did it" before they understand that doing and doing are different versions of the same word. There is a certain predictability (teach, capture, get, forget), while often unpredictability makes learning these words no less than memorizing them (taking changes to make while making changes to changes made). This property of the class of irregular past verbs to be partly memorized and partly derived from predictable rules has made these keywords in the debate between evolutionary-psychological models and Chomskyan-nativist models of language acquisition (Pinker; 2001). Research suggests that children with SLI use bare stem forms (e.g., catch to catch) more frequently than control children (Rice, Wexler, Marquis, Hershberger, 2000). As has been demonstrated with other language skills (Childers and Tomasello, 2002), the research has implied that learning irregular past verbs is facilitated by distributed practice rather than mass practice. Children with specific language problems do not seem to learn these forms as effectively by repeating error phrases with the correct verb form (Williams and Fey, 2007). Identifying the incorrect use of an irregular past verb helps to develop the ability to use these words correctly. Knowing that captured "seems wrong" helps eliminate the common mistake of over-generalizing the form "ed". Tests that evaluate irregular past verbs include owl, SPELT, CASL-Syntax Construction, and PLS. Objectives Tips Edgar will identify wrong verbs at the beginning of irregular development in simple phrases, such as "The bear caught a fish." Joanne will correctly define the wrong verbs at the beginning of the irregular development, e.g. "What is the past Word "Shakeá"? Development of verbs in the past irregular relevant to the curriculum in various sentences, for example: example: The word gets stuck in a tense sentence passed since yesterday.
